Summary

Computer Science Student | Full-Stack Developer | Founder of
CodeNoSekai

I am a Computer Science student at Government Graduate College of Science (GPA: 3.1) with a focus on building scalable backend architectures and automated systems. Operating under the professional alias ahmmikun, I bridge the gap between academic theory and real-world software engineering through extensive open-source contributions.

As the Founder of CodeNoSekai, I lead a global GitHub developers organization. I have extensive experience collaborating with and leading international teams of developers from Indonesia, Nigeria, and the UK to build modular API platforms and backend projects. My work involves managing global collaborative efforts and architecting systems integrated with Node.js, MongoDB, and Generative AI.

I am passionate about solving complex logic problems and optimizing code for performance. Currently, I am expanding my expertise in Artificial Intelligence and System Automation while maintaining a strong academic standing.

Experience

Open Source Projects
Full Stack Developer
2024 - Present (2 years)

Developed multiple frontend and backend projects uploaded on GitHub. Practiced clean code structure and responsive design principles. Integrated basic APIs and dynamic JavaScript functionality.

Education

University of the Punjab

Bachelor's Degree, Computer Science · (October 2024 - October 2028)

Punjab Group Of Colleges

Intermediate , Computer Science · (2022 - 2024)
